

## Webinar: Including People with Disabilities: Public Health Workforce Competencies

*Tuesday October 17, 2017, 12:00 to 1:00 P.M.*

*Please join us for a brown bag colloquium with Dr. Adriane Griffen from the Association of University Centers on Disability (AUCD) to learn how public health can improve the health, employment and participation of Montanans with disabilities.*

**Did you know?** One in five Montana adults live with a disability; however, most public health training programs do not include curricula addressing the health of people with disabilities and methods for including them in core public health efforts. This population has a higher incidence of chronic conditions and experience significant health disparities.

This webinar will cover the *Including People with Disabilities - Public Health Workforce Competencies*, designed to increase the capacity of public health providers to include people with disabilities in their public health plans and efforts. The competencies provide foundational knowledge around the relationship between disability and public health programs and outcomes. Visit <http://www.aucd.org/template/page.cfm?id=830> for more Information on the AUCD Public Health Workforce Competencies for Including People with Disabilities:

### Who should attend?

- Professionals already working in the fields of public health and/or the disability supports.

### What will you gain?

- An overview of the competencies and linkages to public health accreditation.
- Information on local and national resources that public health organizations can access to strengthen their workforce and better include people with disabilities.
- A forum for participants to contribute to the discussion with examples of resources and strategies being used to strengthen the public health workforce and include people with disabilities in quality improvement efforts.
